

Coastal Style Reimagined

More Peace and Well-Being with Feng Shui

RAMONA KRENN

When Rooms Breathe Again

Coastal style touches us because it evokes a sense of openness: the clear horizon, bright light, natural materials, and the gentle rhythm of the waves. Yet a room is shaped by more than its colors and furniture. It is also shaped by its pathways, balance, order, and the feeling that arises the moment we enter. This is where Feng Shui begins.

This book combines the relaxed aesthetic of coastal style with the principles of harmonious spatial energy. It is not about rigid rules or maritime clichés. Instead, it creates a contemporary approach to interior design that brings together lightness, comfort, and clarity.

Start small: with an unobstructed pathway, a calm color palette, or a single place where your eyes can rest. Good design does not grow from having as many things as possible, but from making harmonious choices.

A successful home does more than look beautiful. It helps you arrive, let go, and restore your energy.

CHAPTER 1

Coastal Style Reimagined

Lightness Without Clichés

Effortless Style, Free of Clichés

The new coastal style translates the atmosphere of the sea into a refined, mature design language. Instead of themed décor, the focus is on light, a sense of spaciousness, and the honest use of materials. Light-colored surfaces make rooms feel more expansive, natural wood adds warmth, and woven textiles soften clean lines. Carefully chosen found objects are allowed to tell their own stories, yet they require breathing room.

The Three Pillars

A sense of calm is created by a limited color palette. A natural feel comes from wood, linen, wool, ceramics, stone, and woven fibers. A sense of spaciousness is achieved through unobstructed sightlines, ample floor space, and furnishings that do not overcrowd the room. Together, these three qualities form the foundation of a coastal aesthetic that feels authentic, even far from the sea.

Chapter 1

What to avoid

Too many nautical motifs can quickly make a room feel restless. Pure white combined with cool blue can also appear harsh. Therefore, balance the design with warm elements: sand, taupe, ecru, muted green, and light woods. Repeat a few select materials in several places rather than choosing something different for every detail.
